### Product information

1. The EV Tariff is for the supply of electricity only - if you have a gas supply with us this will remain on its existing tariff.
2. It is a variable rate tariff with no early termination fees and prices may change from time to time. Prices are excluding VAT.
3. The EV tariff is only available to eligible customers. Electric Vehicle (Category B battery or plug-in hybrid) and Smart meter in credit mode required. Fair use policy applies (maximum of 3 Electric Vehicles, must be registered to the supply address). Full details, eligibility and terms available at [uw.link/ev-terms](#).
4. The EV Tariff off-peak hours are midnight to 5am GMT (1am to 6am BST). The peak rate applies at all other times.
5. If you only take UW's Energy Service, then you will get our Value EV Tariff. If you take a 2 Service Bundle with UW, you can get our Gold EV Tariff. If you take a 3 Service Bundle or 4+ Service Bundle with UW, you can get our Double Gold EV Tariff. If you are benefiting from our Gold EV Tariff or Double Gold EV Tariff and cease to be eligible (for example, by cancelling a Bundle Service), we will automatically move you to the cheapest alternative EV Tariff rate which you are eligible to receive from us at that time, taking effect from the 1st day of the next month.
6. If you do not meet or fail to comply with any of the eligibility requirements or other terms and conditions of the EV Tariff then we may transfer you to our cheapest available alternative variable tariff (Standard Variable) or end your agreement.
7. Customers taking both gas and electricity from UW will benefit from a dual fuel discount of £13.00 (inc. VAT) per fuel – this amount being deducted on a daily basis from the standing charge
